

AFSCME
Health and Safety Survey

In an effort to monitor and improve the working conditions of our members, we are asking for your help. There is no question that health and safety issues are extremely important as we go to work each day – each of us wants to return home after work without illness or injury. Potential problems can only be addressed if the union knows about them. And so, we are asking for information that can be used to improve the working conditions at all of our worksites. Please take a few minutes to fill out this survey.
